Advanced Legal English and Legal Writing Skills Training Course

Legal English and Legal Writing Skills is a 2-week advanced training course for lawyers, legal officers and paralegals who work in English as a second language, and it closes with a legal writing style guide for the department. Cross-border deals, foreign counterparties and English-language contracts now make precise legal English a daily requirement. Jupiter Prime Training presents Legal English and Legal Writing Skills through intensive drafting and editing practice.

Why Legal English and Legal Writing Skills Matters Now

Three pressures shape legal English today: more contracts and disputes are conducted in English even when neither party is a native speaker, clients and judges expect plain language instead of archaic phrasing, and digital correspondence leaves a permanent record of every loose sentence. A legal function that writes with precision avoids ambiguity, shortens negotiations and protects its credibility with courts and counterparties; one that writes carelessly invites misreading and costly argument over meaning. The course draws on the plain language movement and the conventions of common law drafting.

Who Gains Most from Legal English and Legal Writing Skills

- Advisers who write legal opinions and memos in English for senior decision-makers
- Contract specialists who negotiate and mark up English-language agreements with foreign counterparties
- Litigation and arbitration support staff who prepare correspondence, witness material and submissions
- Paralegals who summarise case files, statutes and judgments for supervising lawyers
- Corporate secretaries who minute board resolutions and draft formal notices

A legal department sending several members together gains most, because the style guide then reflects shared habits.

Legal English and Legal Writing Skills Capabilities

Participants sharpen the vocabulary, grammar and structure that separate a persuasive legal text from a merely correct one.

- Apply the correct modal verbs for duties, rights, permissions and conditions — the drafter deciding how binding a clause must be
- Build a legal memo with issue, rule, analysis and conclusion in clear order — the partner or general counsel who must decide quickly
- Specify precise contract terminology in place of vague or archaic wording — the counterparty reading the agreement
- Design legal letters that set out demands, deadlines and consequences firmly — the recipient expected to act
- Communicate a legal opinion in plain English with qualifications stated openly — the client relying on the advice
- Test a draft for ambiguity, redundancy and inconsistent definitions — the reviewer signing off the final version

Key Legal English and Legal Writing Skills Terms

- Plain legal English — a style that states legal meaning in ordinary words and short sentences without losing precision.
- Modal verb of obligation — a verb such as shall or must that creates a binding duty in a legal text.
- Term of art — a word or phrase with a fixed legal meaning that differs from its everyday sense.
- Doublet — a pair of near-synonyms, such as null and void, inherited from older legal drafting.
- IRAC structure — a memo pattern of issue, rule, application and conclusion used to organise legal reasoning.
- Without prejudice — a heading that marks correspondence as a settlement offer which cannot later be used as an admission.

Applying Legal English and Legal Writing Skills After the Course

- Rewrite the department's three most-used letter templates using the plain language and modal verb rules taught, and circulate them for comment.
- Run a monthly peer editing session in which colleagues exchange one memo or opinion and mark ambiguity, nominalisation and defined-term errors.

Legal English and Legal Writing Skills Questions FAQ

What are legal English and legal writing skills and why do they matter now?

Legal English and legal writing skills are the vocabulary, grammar and structures lawyers use to write precise, persuasive legal texts in English. They matter now because more contracts, disputes and advice cross borders in English, and a single loose word can change a legal outcome.

Which roles gain most from legal English and legal writing skills training?

Lawyers, legal officers and paralegals who work in English as a second language gain most. They draft, correspond and advise daily, so better precision and plain style directly reduce misunderstandings with clients, courts and counterparties.

How does legal English and legal writing skills training differ from a general business English course?

A business English course covers everyday commercial communication. This course focuses on legal terms of art, the grammar of obligation, contract vocabulary, memos and opinions, and the editing methods lawyers use to remove ambiguity from binding texts.

What do you bring back from legal English and legal writing skills training?

You bring back a legal writing style guide with preferred terms, banned phrases, letter and memo templates and before-and-after examples. It gives your department one consistent standard for every document that leaves the office.

Legal English and Legal Writing Skills: The Way Forward

The legal writing style guide becomes the reference every drafter checks before a document is sent. Its first use is deciding which existing templates are rewritten first, a choice for the head of legal and senior drafters. After the first quarter, revisit its glossary and banned-phrase list against real edits, since recurring corrections show where the guide needs firmer rules.
