Audit Universe Risk Ranking and Annual Audit Plan Training Course

Ref: 2989_113294 **Date:** 26 – 30 September 2027 **Location:** Istanbul **Fees:** 4900 GBP

Audit Universe Risk Ranking and Annual Audit Plan is a 1-week training course for internal auditors and audit managers who build the annual audit plan, ending with a ranked audit universe and a risk-weighted annual plan ready for audit committee discussion. Boards now expect internal audit to spend scarce hours where exposure is greatest, not where it spent them last year. Jupiter Prime Training runs this course for audit functions in many sectors.

Why Audit Universe Risk Ranking and Annual Audit Plan Matters Now

Three pressures shape audit planning today. Audit committees ask why each engagement earns its place. Automation, outsourcing and new products move exposure between units within months. Audit headcount rarely grows, so hours spent on stable areas are taken from emerging ones. A function that ranks its universe well gives the board an honest view of assurance gaps; one that rotates by habit leaves serious exposures unexamined while reporting full plan completion.

Who Gains Most from Audit Universe Risk Ranking and Annual Audit Plan

- Auditors who maintain the inventory of auditable entities, processes and systems
- Audit managers who score entities and propose the annual engagement list
- Engagement leads who turn a plan line into scope, objectives and test steps
- Quality reviewers who check that fieldwork stays on the risks the plan promised to cover

An audit department sending its planning lead with several engagement leads gains most, as ranking criteria become shared practice.

Audit Universe Risk Ranking and Annual Audit Plan Capabilities

Participants move from listing auditable areas to defending why each one sits where it does in the plan.

- Build an audit universe with clear boundaries — the head of audit approving coverage
- Design scoring criteria that weigh inherent exposure, control reliance and change — audit managers ranking entities
- Calculate available audit hours and match them to ranked entities — the annual plan proposal
- Specify engagement objectives and scope from the top risks of each entity — engagement leads
- Test key controls with sample sizes linked to risk ranking — fieldwork quality reviewers
- Communicate coverage and assurance gaps in plain terms — the audit committee

Key Audit Universe Risk Ranking and Annual Audit Plan Terms

- Audit universe — every unit, process, system and project internal audit could examine.
- Auditable entity — one bounded item with a named owner and scope.
- Risk ranking — ordering entities by scored exposure, control strength and change.
- Audit cycle — the target interval between audits of one entity.
- Assurance map — a view of who gives assurance over each key risk.
- Risk coverage — the share of ranked key risks that fieldwork tests.

Audit Universe Risk Ranking and Annual Audit Plan Day by Day

Day 1: The Audit Universe and Its Boundaries

- Strategic Objectives Mapping — Linking Auditable Areas to Board Priorities
- Entity Inventory Building — Defining Units, Processes, Systems and Projects
- Entity Boundary Rules — Avoiding Gaps and Overlaps Between Auditable Items
- Ownership Register — Naming Accountable Managers for Each Entity
- Change Intelligence Sources — Capturing New Products, Outsourcing and Restructuring

Day 2: Scoring and Ranking Entities

- Inherent Exposure Criteria — Rating Financial, Operational and Conduct Impact
- Control Reliance Factors — Weighing Prior Findings and Management Self-Assessment
- Weighted Scoring Matrix — Turning Criteria into a Single Entity Rank
- Calibration Sessions — Challenging Scores Across Audit Managers for Consistency
- Assurance Mapping — Recognising Coverage Provided by Other Assurance Functions

Day 3: From Ranking to the Annual Plan

- Audit Hours Capacity Model — Setting Realistic Annual Resource Limits
- Audit Cycle Setting — Deciding Intervals for High, Medium and Low Ranks
- Plan Trade-Off Grid — Choosing Between Mandatory, Ranked and Requested Audits
- Rolling Plan Reforecasting — Adjusting the Plan When Exposure Shifts Mid-Year
- Audit Committee Plan Paper — Presenting Rationale, Gaps and Deferred Items

Day 4: Scoping Engagements and Testing Controls

- Engagement Risk Assessment — Selecting the Key Risks Each Audit Must Address
- Scope and Objectives Memo — Agreeing Boundaries with the Entity Owner
- Key Control Identification — Separating Primary Controls from Supporting Steps
- Risk-Linked Sampling — Setting Sample Sizes by Entity Rank and Control Frequency
- Coverage Tracking Sheet — Proving Fieldwork Tested the Planned Risks

Day 5: Practising the Ranked Audit Universe and Annual Plan

- Case Universe Build — Applying Entity Inventory Rules to a Utilities Group
- Ranking Simulation — Scoring a Retail Bank Universe
- Scoping Exercise — Drafting Objectives for a Top-Ranked Procurement Entity
- Coverage Reporting Drill — Summarising Assurance Gaps for Committee Members
- Ranked Audit Universe and Annual Plan — Completing the Participant's Own Draft

Applying Audit Universe Risk Ranking and Annual Audit Plan After the Course

- Lead a calibration session in which audit managers rescore the twenty highest-ranked entities using the weighted scoring matrix.
- Add a coverage tracking sheet to the next two engagements and report which planned key risks were tested.

Audit Universe Risk Ranking and Annual Audit Plan Questions FAQ

What is audit universe risk ranking and annual audit plan work, and why does it matter now?

It is the practice of listing everything internal audit could examine, scoring each item by exposure and building the yearly plan from that order. It matters because committees expect hours spent where exposure is greatest.

Which roles gain most from audit universe risk ranking and annual audit plan skills?

Audit managers who propose the plan and engagement leads who scope fieldwork gain most. Quality reviewers also benefit when checking risk coverage.

How does audit universe risk ranking and annual audit plan training differ from a general internal audit course?

It focuses on planning choices rather than audit reporting or fieldwork technique alone. A general course spreads time across the whole audit lifecycle.

What do you bring back from audit universe risk ranking and annual audit plan training?

You bring back a draft ranked audit universe and annual plan built on your own function's entities. It includes scoring criteria, an hours estimate and a committee paper outline.

Audit Universe Risk Ranking and Annual Audit Plan: The Way Forward

The ranked audit universe and annual plan first informs which engagements enter next year's list and which are deferred with a stated reason. The head of audit presents it to the audit committee, and engagement leads use it to scope fieldwork. After the first cycle, the scoring weights deserve a second look against what fieldwork actually found.
